

St. Louis Post-Dispatch.

VOL XXXII.

ST. LOUIS, SATURDAY, MARCH 22, 1884.—TWELVE PAGES.

NO. 223.

THE CONTRAST BETWEEN BELDING BROS. & CO.'S "SUPERIOR" Pure Thread Knitting Silk AND THE KNITTING SILK MADE BY OTHER MANUFACTURERS.

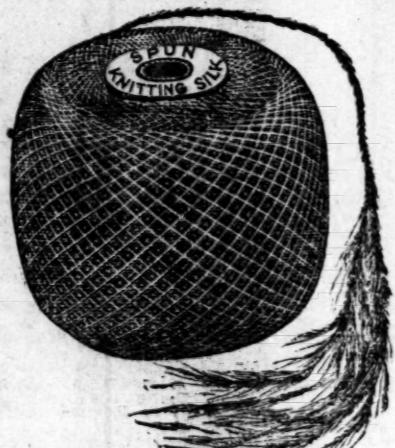

This cut shows the fibre from which Belding's Knitting Silk is made.

BELDING'S SILK may cost a trifle more than spun silk, but it is really cheaper.

In making the article with BELDING'S SILK all its parts will have a uniform luster.

After months of handling and wear, the article made of BELDING'S SILK retains its freshness and brilliancy.

Articles made of BELDING'S SILK wear well, last a very long time, and keep their beauty to the last.

This cut shows the fibre from which Spun Silk is made.

Spun Silk being made of waste material, should be sold for less than BELDING'S SILK.

The article of spun silk will have no lustre; the parts that are most handled in making will lose their brightness.

After a few weeks' use the article made of spun silk looks as if made of cotton.

Articles made of spun silk, besides becoming shabby, wears out soon.

Don't allow your dry goods dealer to impose upon you by selling you some other silk and representing that it is "just as good as BELDING'S."

McNICHOLS IS YOUR MAN!!
INTERVIEW HIM ABOUT YOUR HOUSE.

Most people agree with the poet
Who sang: "There is no place like home,"
Then often their actions don't show it.
Because they are afraid to meet him.
But there is one man who is able
To meet him, and that is McNichols.
With bedsteads, a Chair and a Table,
And what will go right to the spot.
Where to buy? There is no place so plenty,
And furniture scattered broadcast,
To be had at one price, and another.
That is the reason that in twenty
Years he has not one in twenty
Drop in on your way down town at 1022-1024 Market street and look at the prettiest, cheapest Furniture
in St. Louis to day.

THE ONLY McNICHOLS.

WINN
Boiler Compound Co.
Manufacturers of
Winn's Vegetable Boiler Compound.

No. 106 Olive St., St. Louis, Mo.

Below find some of our Numerous Testimonials of parties who are using it.

GENTS.—Your Compound has given perfect satisfaction to those who have used it. I can assure you that your Compound is as good as any that could be made that would do oneself credit. It is a great convenience to have it ready to use. Please send me another half barrel.

McGUFFIN, Engraver and Supt. Press, Post-Dispatch.

St. Paul, Jan. 22, 1884.

GENTLEMEN.—We have used your valuable Compound in our boiler, and desire to say it is the best boiler compound we have ever used. We have never had any injury to the iron, and I will continue to use your Compound in my boiler.

CHAR. STAHLMAN BREW CO.

St. Paul Minn., January 22, 1884.

GENTLEMEN.—We have used your valuable Compound in my stationary boiler. I can assure you it is as good as any boiler compound we have ever used. It has even exceeded my notice, and I have no objection to other compounds we have tested for a similar purpose.

Please send us another barrel of it, and oblige.

Very truly yours,

S. C. FORSAITH & CO.

Manchester, N. H., January 22, 1884.

GENTLEMEN.—It gives us particular pleasure to state to you that your Compound is for the protection of steam and fire-tube boilers. We have used it in our steam boiler, and found it to do all you claim for it. It gives the same gives us satisfaction, and that we would not like to be without it, considering it is the highest detergent.

Please send us another barrel of it, and oblige.

Very truly yours,

W. M. MCINTYRE.

St. Louis, Feb. 22, 1884.

GENTLEMEN.—I am sorry to say that your Compound did not give me the satisfaction I expected. I have used it in my boiler, and found it to do all you claim for it. It gives the same gives us satisfaction, and that we would not like to be without it, considering it is the highest detergent.

Please send us another barrel of it, and oblige.

Very truly yours,

W. C. FORSAITH & CO.

St. Paul, Feb. 22, 1884.

MR. WATTERSON wants the Democratic party to swap horses while crossing a stream.

BLAINE's friends hasten to declare by authority from him that there has been no reconciliation between him and CONKLIN, simply because CONKLIN would not have it.

If the city is paying for macadam when it pays for the refuse, which was dumped yesterday into the chukholes in the Market street pavement in front of the Post-Dispatch office, the city is badly swindled.

AS soon as the scare about the foot and mouth disease is over we shall move for an endowment of a veterinary college. This country has too many men bearing the title of M. D. and not enough bearing the title of Vets.

Owing to the pressure of advertising we are again compelled to change the "make-up" of the paper, and a great deal of the news of the day appears in the supplement. We are not devoting much space to editorial articles to-day, but none of the news is omitted.

It would save us a great deal of trouble if gentlemen who have robbed their employers would send their address to this office with a statement of the facts in the case. We are bound to find them out sooner or later, and from every point of view it is preferable to find them out sooner.

SENATOR MORGAN opposes the bill to give United States District Judges better pay for the reason that he does not think highly of the gentlemen who now wear the benches of the United States District Courts. Perhaps if he would pay better salaries he would get better judges.

A St. Louis paper which averages a daily circulation of more than thirty-one thousand copies has a pretty big circulation, but this is a campaign year, and if we can only keep our grip on both wings of the Democratic party we expect to report our customary annual growth by the end of the year.

MR. WATTERSON is entitled to a great deal of credit for his success thus far in acting as a wedge between the riven sections of Democracy. He probably thinks that he is a bigger man than T. JEFFERSON, just as the aspiring youth who fired the Ephesian dome is a bigger man than the pious fool who reared it.

There is talk in England of a dissolution and an appeal to the country, and the Tories are rejoicing over the prospect of securing a majority. If they will only consult RANDALL and CARLISLE and MORRISON and the other prominent Democratic leaders, these gentlemen will probably tell them that an inharmonious majority is more of a detriment than of a benefit to any party.

The majority of the Dockery Committee shrank from the duty of presenting the case against KEEFER as harshly as it was presented to them by the evidence. They united with the minority in making a unanimous report, the mildest and most merciful that any friend of his on the committee could ask for. Yet he was seen at DOCKERY'S desk yesterday begging for further modifications of the summing up against him. The spectacle the ex-Speaker made of himself attracted the attention of the whole House.

A MEMBER of the Historical Society, having expressed through our columns his surprise that Dr. J. B. JOHNSON should have joined with the other LUCAS heirs in trying to recover the lot needed by the late JAMES LUCAS to the Historical Society, we take great pleasure in doing that well-known gentleman the justice of stating that he is not a party to the suit at all. He and his wife deeded their interest in the lot to the society some years ago, and have no intention or desire to get it back. Dr. JOHNSON, we may add, was one of the founders of the Historical Society, of which he has been a steady supporter.

A CAUCUS of the Democratic members of Congress is called for next Tuesday, and the captains are shouting loudly to the tariff reformers that RANDALL's following will be a handful. As a fighter, however, they seem to think RANDALL is a host by himself, and, with ill-concealed treachery, they express a willingness to accept amendments that will still further commend the Morrison bill to the Protes-

tionists. The caucus mountain in labor under such circumstances is liable to bring forth a very ridiculous mouse. Suppose it brings forth a bill which RANDALL and his alleged Republican allies are willing to take up and pass as a harmless nothing, merely to stop agitation. An awkward squad thus much ado about nothing, would cut a very ridiculous figure indeed.

OUR readers may remember that a year ago so the Post-DISPATCH exposed the shameful abuses of the Marine Hospital of this city. The investigation disclosed that while the resident physician was living in luxury the poor river men who paid his salary were treated like brutes. The result was a speedy change in their accommodations, but no change in the management. Yesterday a charge was trumped up against the veteran Capt. DELANCY, who had dared to speak a word against the official humbug in charge of the hospital, and he was arrested to be made to feel the vengeance of insulted officialism. We propose to see that justice is done in this matter.

MR. SIMON CAMERON, returning from a winter tour through the South, tells a Post-DISPATCH correspondent in Washington that the present generation of whites in the South are more ignorant and intolerant than was before the war.

MR. PATRICK'S DAY and parade received an audience from a source most unexpected, because an instinctive hostility seems to exist between the two races, and in all the investigation into the history of the Irish people no colored Irish family has ever been discovered of sufficient distinction to be mentioned. The most prominent object attached to the procession Monday, as it passed the Court House under review was the woman who was the sponsor of her ring and the pretender of her carriage the flower-decked marshals themselves. In her hair was twined a broad green ribbon and on her breast was pinned the emblematic shamrock. She was only a side-show, but she divided the honors with the knights and her procession of shouting hoodlums was nearly as large as their lines of solid veterans.

TALKING of St. Patrick's Day I understand that the largest number ending after the most anticipated style of a scene at a Donnybrook fair. A prominent merchant, nor of Irish extraction, expressed the opinion that a citizen of the United States ought to place his citizenship and his adopted country above all else. A prominent politician of Irish extraction took exception to the remark and declared that Irishmen ought to be Irishmen first, and in the elaboration of his speech soundly rated a number of prominent speakers for the small place they had given Ireland in their defense.

MR. BLISS has told a story which is as follows: When he got into the Star Route trials he was lured and thick with signs of war avante, but peace was restored without bloodshed.

BLISS and SPENCER have between them given Secretary CHANDLER an opportunity to go to the witness stand and explain a thing or two. SPENCER testified that he sought an interview with BLISS through CHANDLER, and that CHANDLER's report of what BLISS said on the subject filled him with a strong desire to be far away in foreign lands when the Star Route trials were in progress. Now BLISS testifies that CHANDLER tried to make him afraid to put SPENCER on the witness stand, and said: "SPENCER is that kind of man who has such devotion for his friends, he will say no if you ask him if he knows anything. I don't believe you will get anything out of him on the witness stand." This was the Secretary of the Navy, giving his official opinion of an ex-Senator and brother Republican! Why was a Cabinet officer meddling thus with a matter in the hands of the Department of Justice, and doing his best as a go-between to keep SPENCER off the witness stand by scaring him away with alleged threats from BLISS, and at the same time making BLISS afraid to introduce himself as a witness? The verdict of the jury was an absurd bundle of contradictions, but not more so than the administration which supposed to be upholding the prosecution.

THE METROPOLITAN PRESS.

What is the Editor of the New York Journal doing to-day? By telegraph to the Post-Dispatch.

NEW YORK, March 22.—The WORLD says: Mr. Carlisle and every Democratic Congressman must see that the tariff issue is a firebrand to unite the country. We trust their good sense will teach them to pursue a policy of non-interference, but if they do not, let them postpone the tariff question, on which the party is divided and which is a great source of trouble.

I NOTICE that the furor for old-fashioned folding and sealed envelopes, which swallows has been quieting with some time, has struck in on St. Louis society vigorously. In consequence, a silk seal of wax, a candle, a stamp and a monogram crest or pretty design of some kind on it to prevent the wax are necessary articles in a real swell writing outfit. The fashion is a pretty enough fancy, but it is too inconvenient and troublesome to write on it.

KITTLE—The only society of the kind is the society for the prevention of cruelty to animals, and works as hard with brain and pen as Mr. George William Curtis, who wears as well, writes a New York journal.

FITZ JOHN PORTER does not look to be over 45, and does not show any wasting away over the years. He has met his match in Mrs. L. S. Morgan.

THE WILL of the late Mr. Chenevay, editor of the London Times, after providing for his invalid and making a few bequests to friends, gives the remainder of his property to the seven children of his friend, Mr. Macmillan.

DETROIT comes forward and boasts the oldest inhabitant in the person of John Waiters, who was born on St. Patrick's Day, 1779, making him 105 years old. He was active in the Irish rebellion of 1798, and attributed his good health and long life to the persistent but judicious use of whisky and tobacco.

THE WEEK ABROAD.

Where the Readers of the Post-Dispatch Find a Hearing.

To the Editor of the Post-Dispatch:

A communication in your paper of the 20th, signed "A Mother," I recognize as a pliant as one of the greatest iniquities that ever disgraced our law and order system. I want to emphasize that the burden of proof is upon the party of those who have been wronged.

A. D. McKEAN (Walnut Valley, Miss.)—The Manual Training School in this city is an admirable institution. Its course of study includes the mechanical arts, turning, blacksmithing, machinery, the steam engine, etc.

THE PEOPLE'S FORUM.

A RED SUNSET.

That of the Theatrical Week Now Closing.

Chern's Chat on the Attractions of the Week Gone and That to Come—Gossip of the Green Room—White Elephant Legends—Stage Splinters and Local Notes.

The stages of at least three of the local theaters have been exceedingly gory during the past week, and the aggregate of stage deaths in St. Louis must have added materially to the mortuary reports of statisticians in that direction. "Fedora"—one of the most perfect and elaborate stage representations ever given here—"Monte Cristo" and "The Stranglers" are all representative of very lurid albeit different schools of the French drama, and all entail more or less loss of the vital fluid in their action. The offset of comedy at the other houses was peculiarly refreshing, and a week of very large business in the aggregate is recorded—an excellent showing for a Lenten week in St. Louis. ***

Next week there will be several very interesting openings, and no doubt the good business will be sustained. Mme. Januschek is certainly deserving of a splendid patronage from the better class of theater-goers, for in a certain class of heavy classic characters she is univaled, and stands like a giantess amongst pigmies. Not only in this especial branch but in characters which are akin to these is she an exceptional artiste. Her Lady Macbeth one of the most impressive and wonderful pieces of acting in the stage. Mary Stuart is far above the rest of the part recently given here, that it does not seem to me that she can be equal to the best interesting feature of this engagement will be the appearance of Mme. Januschek in three characters comparatively new, Zaria, Marie Antoinette and Anna Karenina, in the Olympic Sunday evening in Zillah. Her company is a strong one, and the plays will be placed on the stage. Januschek has vowed never to appear in St. Louis again, so clearly has she appreciated on former visits, and it is not to be wondered at. It is to be hoped however that she will have no such complaint to make next week, and that she will return to the patriotic shores. Corlotta Cushman, upon being asked regarding her succession, responded, "Fanny Januschek will be the tragedienne of the future." I can only say that any other actress does show presence qualities and certain phases of strength peculiar to the great American actress. ***

Manager Edwards is doing a very good and remunerative business at the Theater Comique. It is the only place where the public can go to see a good show at a very good standard of popularity. The schedule of prices is exceedingly light and yet the entertainment is invariably good. Adelicia Dingley is another very agreeable actress, and always gives a good performance. The trayling out of a dulle there is a great proportionate return than at any other place of amusement in town. Manager Edwards is very well satisfied with his arrangements for next week which will be duly announced. CHERUB.

Stage Splinters.

Lester Wallack's Florida trip brought him perfect recovery.

The twenty-fingered woman was married in Chicago last week.

Mme. Sembrich does not now anticipate returning to this country next season. She has an offer for a season at Madrid, which she is considering accepting.

Wallack's Theater, New York City, has been taken by Mr. Maurice Gran for five weeks, beginning September 8, for a season of opera bouffe with Mme. Theo as the star.

Mr. Otis Skinner, for several seasons with Lawrence Barrett, joins Daly's company as leading man for the London engagement, and is engaged for next season at Daly's Theater.

Miss Lyndsay Thompson has patented a new device for presenting wonderful aurore borealis effects on the stage. It was successfully tested in "Storm Beaten" at Niblo's last week.

A number of the "Black Crook" ballet girls have been seen at the Palace's jubilee performance at Cincinnati, to celebrate its fiftieth year on the stage. After the performance they congratulated him and all present on the success of his debut as an actor, which they all remembered to have been very successful.

Every lady patron of theaters has discovered that her escort is generally annoyed between the acts by being compelled to go out to the bar to get a drink. This is a general affliction of the sexes, it may be as well to say that the "man" generally wears a white vest, a big cluster pin in his shirt-bosom, is coatless, and displays a finely colored nose.

The London Italian opera season is to commence on Tuesday, April 23, and it is to continue a selection of those operas of the repertoire which have from time to time been merely afflicted with a species of scrofula or leprosy, and are really but a few shades lighter than the ordinary animal.

This goes to show that the objects of general interest and reverence by men in certain localities, but I imagine that outside of Siam there are scores of owners who possess the disdained qualities, and are too good to dispense with. At least we seem to experience much trouble in obtaining them, and Barnum will not have so much of a monopoly as he no figure.

Mr. James T. Powers, who went to London last summer, has been playing since his return to New York, and gave him \$200 for finding out all about sacred white Siam. Mrs. Langtry, herself, has been a partner in this venture, and will share the profits with the Vokes family, taking the place of Mr. Fawdon Vokes. Miss Marie Williams will also come over with this party.

It is true that Mrs. Langtry is going into business in London, but she is not going to leave the stage. So far as the theater is concerned, Mrs. Langtry and myself will be in partnership, and shall retire from active theatrical life. I do not care to mention which party is to be the greater.

On this capital of \$20,000, the investment of about ten hours' time and an understanding of the language, we can introduce an American idea into London, and expect to make money.—(C. A. Menden to New York Interviewer.)

The play introduced village maidens, according to Mr. Elworthy, and his minister, who desired to secure our experience of good investments at the time of which we pleased to show up.

Just here I can not refrain from proposing a portion of an interesting chapter from the series of reminiscences now appearing in the New York Mercury and ostensibly written by Harry Hill. It would be a good idea to copy it, as it is not a new one. Tom King, a circus man, originated the idea, but he contented himself in the following style: "He got hold of a caged orangutan, and when he had secured him, he took him to a circus, and when he had been laid out all about sacred white Siam, he was to be sold for \$200. He was taken to the hospital. He is recovering, and has a good deal of fun with the Vokes family, taking the place of Mr. Fawdon Vokes. Miss Marie Williams will also come over with this party.

BOCUS BUTTER.

Paid for by the City at Prime Creamery Prices.

How Cheap Oils are Mixed With Butter
—The Adulteration of Milk—Efforts of Dealers to Suppress It—Dishonest Buyers and Mashed Servant Girls.

The city fails to get value received for a large portion of the money which is paid for foods supplied to the various public institutions," remarked an analytical chemist this morning to a Post-DISPATCH reporter who was making an inspection of his new laboratory. The reporter expressed his surprise and asked for particulars. The chemist resumed the interesting subject, saying, "There is a big difference, a large percentage of foods which can only be tested by chemical analysis. It has no means of applying this necessary test to what it buys, and that is imposed upon me made to pay very heavily for adulterants while at once swell the volume and diminish the cost of its purchases. No one of the city officials takes more interest in the matter than good Dr. John C. Deacon, warden of the Hospital. The sick people under his care are very poor, know little, and are dependent upon good food for proper medicine for their recovery, and his concern extends to the wish that I might apply a searching test to the foods it buys. It is true, however, that a few days ago Dr. Deacon had doubtless the same idea in his mind as the latter which was being supplied to the hospital, sent me along a couple of specimens to analyze, and results showed him it in a report as follows:

"One sample of butter purchased from the City Hospital on the 26th of February, 1884, is analyzed, and has given the following results:

Water.....	54.00
Fat substances, except water and fat.....	45.00
Butter fat.....	70.94
Strage fat.....	17.73

From this report," said the analyst, "it appears that the city pays the butter price for about 18 per cent of strange fat, a swindle which, in a very short time, would amount to a very large sum of money."

"What does this strange fat consist of?" the reporter asked.

"A considerable number of young women, and considerate of their health, have been pronouncing many families of social prominence—a deep blue—would not a bad selection."

"Small teeth being fashionable in women, a number are said have submitted to an operation in dentistry which gives them an appearance which is very attractive, and are advertised as the 'fashionable craze.'

"Oriental wraps, so called, are recommended for the ladies, and are very popular, and are especially by residents of the lunatic asylum."

"Who is this Mr. Osman Digna?" asked Mrs. Parvane, laying aside the morning paper he had just handed her husband.

"Why, he's that actor, young Egyptian man they've sent to lick the Egyptians."

"What does this strange fat consist of?" the reporter asked.

"A considerable number of young women, and considerate of their health, have been pronouncing many families of social prominence—a deep blue—would not a bad selection."

"Small teeth being fashionable in women, a number are said have submitted to an operation in dentistry which gives them an appearance which is very attractive, and are advertised as the 'fashionable craze.'

"Oriental wraps, so called, are recommended for the ladies, and are very popular, and are especially by residents of the lunatic asylum."

"Who is this Mr. Osman Digna?" asked Mrs. Parvane, laying aside the morning paper he had just handed her husband.

"Why, he's that actor, young Egyptian man they've sent to lick the Egyptians."

"One sample of butter purchased from the City Hospital on the 26th of February, 1884, is analyzed, and has given the following results:

Water.....	54.00
Fat substances, except water and fat.....	45.00
Butter fat.....	70.94
Strage fat.....	17.73

From this report," said the analyst, "it appears that the city pays the butter price for about 18 per cent of strange fat, a swindle which, in a very short time, would amount to a very large sum of money."

"What does this strange fat consist of?" the reporter asked.
